<p>5</p>	 <p>The screenshot shows the 'Configuration' screen with the following settings: Name: Hiper SR Network RTK, Type: Network RTK, Corrections: VRS, Protocol: NTRIP 1.0. A 'Next >>' button is at the bottom right.</p>	<p>Name the configuration so you can identify it, usually I use the instrument model and working style, in this case Hiper SR Network RTK Set other options as shown and click Next</p>
<p>6</p>	 <p>The screenshot shows the 'Receiver Make' screen with 'Simulation Mode' unchecked, 'Manufacturer' set to 'Topcon', and 'Post Processing' unchecked. '<< Back' and 'Next >>' buttons are at the bottom.</p>	<p>Set the Manufacturer to Topcon or Sokkia depending on the instrument you are using then click next</p>
<p>7</p>	 <p>The screenshot shows the 'Rover Receiver' screen with 'External Receiver' checked, 'Receiver Model' set to 'HiPer SR', 'Serial Number' empty, 'Elevation Mask' set to '13 deg', and 'Antenna' set to 'HiPer SR'. 'Ant Height' is set to '2.000 m'. '<< Back' and 'Next >>' buttons are at the bottom.</p>	<p>Set your Receiver Model and leave other settings as shown and click Next</p>
<p>8</p>	 <p>The screenshot shows the 'Internet Address' screen with an 'Address list' containing 'Topnet (rtk.topnetlive.com:2101)', 'SmartNet (uk.nrtk.eu:7801)', and 'ITALY (195.96.217.166:2101)'. The 'Address' field is set to 'rtk.topnetlive.com:2101' and the 'Label' field is set to 'Topnet'. 'Delete' and 'Add new' buttons are below the list. '<< Back' and 'Next >>' buttons are at the bottom.</p>	<p>Select the NTRIP server you would like to use. In this case they are already created but to create a new one type in the Address followed by a colon: and the port number, type a name in Label and click Add New Click Next</p> <p>N.B Smartnet address: uk.nrtk.eu:7801 Topnet: rtk.topnetlive.com:2101</p>

<p>13</p>		<p>Click the Green Tick</p>
<p>14</p>		<p>Go back to the home screen and then Connect Make sure the configuration you have just created is selected and click Connect</p> <p>N.B. Tick both boxes so the connection starts automatically when you start MAGNET</p>
<p>15</p>		<p>The controller will do a Bluetooth search, select your device and click Select The name of your device should be the model followed by the serial number e.g. HIPER V 1143-12345. On the next screen untick BT PIN Required and press Connect</p>
<p>16</p>		<p>The Network tab should now automatically open and ask you to select a mount point Pick the relevant mount point from the drop-down box and press Connect</p> <p>You should now be connected to caster and ready to work</p> <p>N.B Usually mountpoint for Smartnet should be MAX-RTCMv3 and NET_RTCM3 for Topnet</p>
