

Radiodetection RD8100

Precision Cable and Pipe Locator

The RD8100 is engineered to deliver optimum precision for damage prevention. With optional integrated GPS and usage-logging, and backed with a three year warranty, the RD8100 keeps users and businesses on the right line.

With utility infrastructures becoming more complex, locate professionals require more powerful and flexible tools. Features such as Current Direction and iLOC combine with the versatile Tx Transmitter range to deliver highly responsive locates even in tough conditions

Integrated GPS and usage-logging options automatically generate data for custom reports, or in-house quality and safety audits to promote best working practices.

- Current Direction (CD)
- Automatic usage logging with GPS positioning
- Combine accuracy with speed – Peak+ mode
- Use Power Filters™ to pinpoint and discriminate between power cables
- Trace high impedance utilities with 4 KHz – and with CD
- Quickly follow lines with Guidance Mode
- Customise the locator to your network frequencies
- Fault Find
